More coverage from a smaller evidence footprint

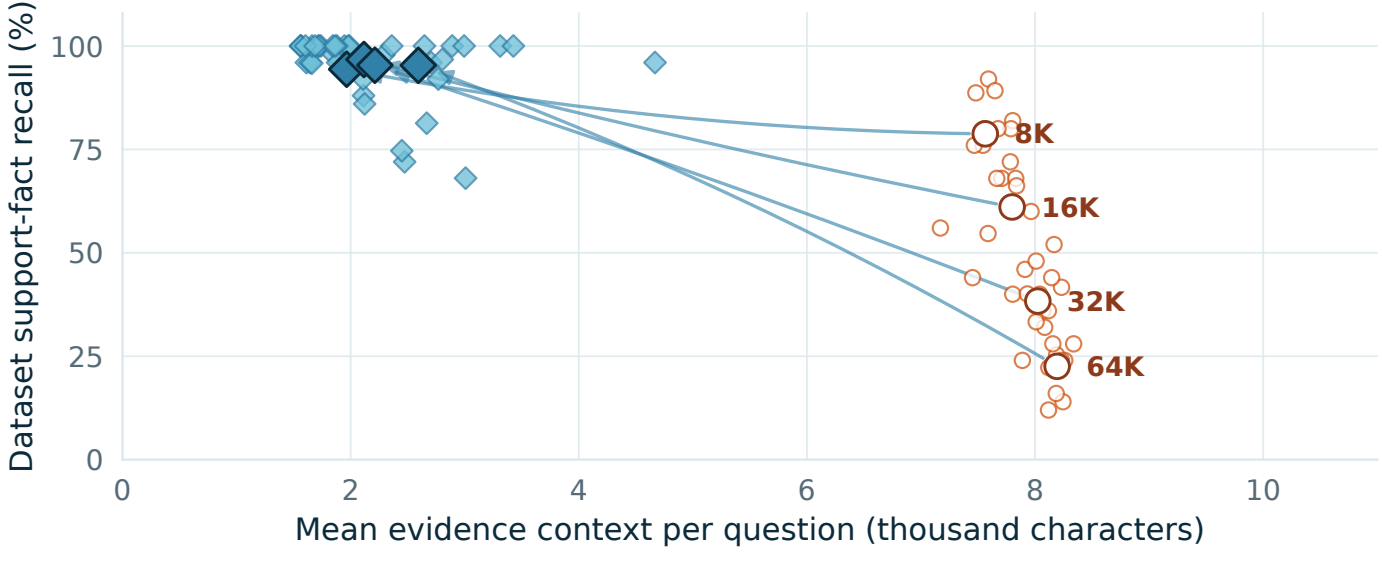

BABILong · Matched question budgets · Saved evidence contexts and annotated supporting-fact coverage

Vanilla Cartridges data Query-specific data (ours)

a COVERAGE × CONTEXT SIZE

7.89K → 2.22K characters

71.9% smaller mean context · identical exercise counts

Small points: all 40 task–length means. Large points / arrows: four length means on 994 paired recall cases.

b ALL 1,000 CASES

The full size distribution

Empirical cumulative curves · no smoothing

Right: mean evidence size within each case, then the empirical distribution over 1,000 cases. Markers locate its 25th, 50th and 75th percentiles.
