evidence view $P_E$ (= SD target)
whole-document view $P_W$
DualJSD target $w \cdot M$
E is unsure, W is confident
→ target follows the agreeing mass
$w = 0.58$
E and W confidently disagree
→ $w \approx 0$: token is not learned
$w = 0.00$
E and W agree
→ same target as SD ($w \approx 1$)
$w = 1.00$
